*Vista Community Clinic congratulates  
Barbara Mannino on receiving the  
Vista Education Foundation  
Lifetime Achievement Award.*

Barbara Mannino has been involved with providing health services for over 40 years. During the past 30 years, Barbara has served as the Chief Executive Officer of the Vista Community Clinic. Under her leadership, VCC grew from a small, church domiciled, community based organization with a \$500,000 annual budget and thirty staff members, to a major regional health system with a budget of \$35 million, 530 staff members, five state-of-the art clinic facilities and a 25,000 sf administrative office building. During her tenure, VCC provided health and dental care, and health education to over 57,000 individuals, of which nearly half are children. VCC was one of the first clinics in San Diego County to offer health care for HIV patients, as well as provide medical care and health education to North San Diego County's large agricultural and migrant worker population. VCC has maintained a long collaborative relationship with VUSD by providing health and dental services, pediatric case management, and on site after school programs. Over the years, VCC has been recognized nationally for many of its innovative community programs. Barbara has served on numerous boards and advisory committees, as well as coached many non-profit CEOs. We are pleased to recognize Barbara Mannino with a Lifetime Achievement award.
